1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

2. Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gott GB 2,041 in view of Garick, U.S. Patent No. 3,758,329 as set forth in the previous office action, paragraph no. 2, and further in view of Shambelan, U.S. Patent No. 3,531,363. Gott differs from the claimed invention because Gott does not disclose that the coating is discontinuous. Shambelan teaches that aligned fibers may be bonded with a discontinuous coating so that the resulting bonded array has a more fabric-like feel and is breathable. See col. 1., line 62 – col. 2, line 20; col. 2, lines 65-70; col. 3, line 39-45. . It would have been obvious to one of ordinary skill in the art at the time the invention was made to have formed the Gott material so that it comprised a discontinuous coating. One of ordinary skill in the art would have been motivated to employ a discontinuous coating by the expectation that this would form a breathable and more fabric-like final product. With regard to claims 19-20, the fibers in Gott are uniformly spaced.

3. Applicant's arguments filed 10/12/05 have been fully considered but they are not persuasive. Applicant argues that none of the applied art teaches the claimed invention because Gott teaches a continuous coating, Garick teaches applying the coating to the entire filament and Shambelan teaches warp and weft fibers. However, Gott teaches parallel fibers which are coated with a binder on only one side and differs from the claimed invention in that Gott does not teach a discontinuous coating. However, Shambelan does teach that bonding fibers with a discontinuous coating produces a breathable material which is desirable in that

it produces a more fabric-like final product. Also, each layer in Shambelan is made with parallel fibers. With regard to Garick, this reference is relied on for the particular fibers which can be used to form bonded fabrics. Therefore, since there is a motivation to combine the references the rejection is maintained. In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
